

# Canvas: Code Highlight Tool

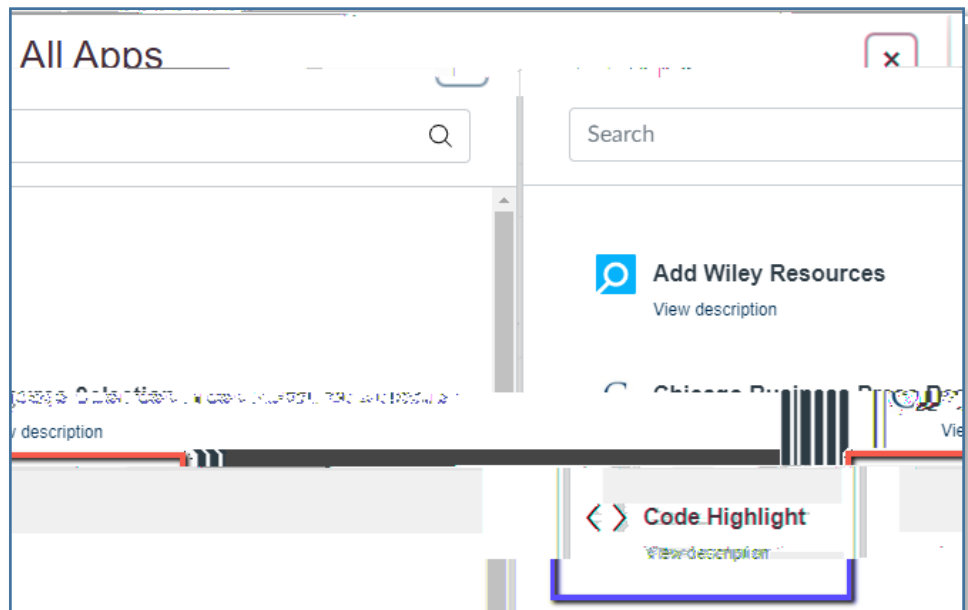

## How to use Code Highlight

You can use the Code Highlight tool to highlight code on Canvas pages or anywhere you enter or edit content using the Canvas content Editor.

1. In the content editor, click on the **plugin icon**, then **View All**

2. Select **Code Highlight**, then click on **View All**

3. O...  
S...  
C... Insert.

```
Code Highlight  
$query = "SELECT Name, CountryCode FROM City";  
$result = $mysqli->query($query);  
  
/* numeric array... */  
$row = $result->fetch_array(MYSQLI_NUM);  
printf("%s (%s)\n", $row[0], $row[1]);
```
