

Old Dominion University is located in Norfolk, an area also known as Hampton Roads. The region is rich with American history from periods and events that helped shape the United States—like the first European settlers in the “New World,” and the American Revolution. Old Dominion is only 20 minutes from the sunny sands of the vacation destination Virginia Beach, with other great attractions and activities like Busch Gardens and Colonial Williamsburg in close proximity. Of course, the hub of American history can be found three hours away in Washington, D.C., where some of the

With the rapid expansion of technology in sectors like transportation, defense, manufacturing, systems integration, and healthcare—the demand for those who can create, understand and alter electrical and computer systems has risen accordingly. As technology evolves, engineers with graduate degrees are needed to offer quantifiable benefits to society. *Electrical and computer engineers equipped with graduate degrees* see significant salary growth.

The Department of Electrical and Computer Engineering (ECE) in the Frank Batten College of Engineering and Technology at Old Dominion University offers master's and doctoral graduate degree programs.

is available for qualified graduate students through teaching and research. A limited number of graduate positions are also available to students pursuing doctoral degrees. Please contact the Graduate Program Director or visit our website ([www.ece.odu.edu](#)) for more information.
