

Working Safely with Scissor Lifts

OSHA
Safety
Alert

Alert highlights specific hazards present in workplaces where scissor lifts are used and controls

Employees in a safe, healthy work environment are more productive and engaged. Safe and healthy workplaces are also more profitable. OSHA's mission is to prevent workplace injuries, illnesses, and deaths. OSHA works with employers and employees to identify and prevent workplace hazards. OSHA also provides training and resources to help employers and employees understand and prevent workplace hazards. OSHA's website, www.osha-slc.gov, provides information on OSHA's mission and activities. OSHA also provides a free consultation service to help employers and employees understand and prevent workplace hazards. OSHA's toll-free number, 1-800-321-OSHA (6742), is available 24 hours a day, 7 days a week. OSHA's website, www.osha-slc.gov, also provides information on OSHA's mission and activities.
